ORGANIC

Netafim's comprehensive package

Designed to Improve Yields and Cut Costs.

Netafim's environmental drip irrigation technology opens new growth and profit opportunities for organic growers. Our Nutrigation™ concept - precise delivery of water and nutrients directly to the plant root zone increases both the quality and quantity of your crops while promoting water and environmental conservation.

Organic growing projects designed by Netafim™ to meet the requirements of specific customers, have been implemented successfully worldwide.

Drip irrigation brings a host of benefits

- Ensures accurate irrigation and Nutrigation™
- Reduces weeds
- Activates compost - the main source of nutrients
- Saves water; reduces runoff
- Maintains the correct air and water balance in the soil
- Economizes on manpower costs and time - minimal hands-on involvement
- Prevents diseases - drip irrigation keeps leaves and fruit dry

Contents of the Package

- Green Irrigation Head-Control: fitted with a nutrition pump engineered for both intensive organic Nutrigation™ and system disinfections. The unit also comprises a self cleaning automatic disk filter.
- Unique drip irrigation system featuring highest irrigation uniformity and clogging resistance.
- Nutrition-irrigation scheduling and technical support.
- Optional: remote control Nutrigation™ and fully automated irrigation via in-field sensors.

Special features to ensure the success of your organic crops

Hydraulic Design

Netafim™ provides an irrigation system especially tailored to your requirements. We take into account the crops you grow, quality of water, type of soil, and environmental conditions.

Professional Growing Applications

- Solutions for open field crops and greenhouses
- Implementation and technology of Surface and Subsurface Drip Irrigation (SDI)
- Netafim's innovative "Feeding Channels" method for orchards and vineyards

Effective Products. Easy Maintenance

- **Clog resistant equipment:** The system is based on reliable, self cleaning and accurate dripperlines. Irrigation systems are designed to enable periodic flushing and disinfection applications
- **Easy-to-follow maintenance:** Instructions for effective operation and efficient upkeep are included in the package.

About Netafim™

Netafim™, the pioneer and global leader in drip irrigation, is one of the world's leading low volume irrigation systems companies. A committed member of the Israel Bioorganic Agriculture Association (IBOAA) and the International Federation of Organic Agricultural Movements (IFOAM), Netafim™ is actively involved in worldwide efforts to protect the environment and enhance the quality of life on our planet.

Organic farming is therefore a key area of importance in our corporate strategy. For this reason, we continue to channel our vast experience and scientific resources, into developing innovative irrigation solutions to produce best organic yield, while restoring soil fertility to its natural state.
