

WALK-TUNNELS

LOW COST GREENHOUSE FOR SOIL GROWING

Tunnel height up to 4.5m

Snow slide shaped arch

Trellising cable 4mm

Benefits & Features

- Simple and easy to install.
- The Gothic-shaped arch enables snow to slide down the sides.
- Suitable for sloped areas, without requiring special site preparation.
- Suitable for all types of crops: flowers and vegetables.

- Netafim's walk-in tunnels are available in 8m or 10m span width configuration.
- The tunnel is covered with polyethylene, and withstands standard wind loads and a trellising load.
- Tunnel height: 4.50m for 10m span and 4.10m for 8m span.
- Option for vertical curtains at a height of 2m meters on the tunnel sides.

A greenhouse by Netafim provides:

- Fast and easy structure installation.
- Top quality greenhouse structures backed by the latest in house horticulture technologies.
- Flexibility in design according to customer requirements.
- Proven experience in structure resistance to strong winds up to 150 km/h.
